Benefit from working with a Pre-Health Advisor who can help you with course selection and schedules as well as guide you through the application process for medical school, physician assistant or other graduate programs.

Participate in Bryant’s health care mentor match program and connect with faculty who have expertise in all the areas of the health care industry that most interest you.

Explore course offerings in health, medicine, and science. Take an EMT course for credit and start accruing critical direct patient care contact hours as early as your first year.

DREW PHELAN ’16
University of Massachusetts Medical School
Worcester, MA

MAJOR: Biology
MINOR: Human Resource Management
HOMETOWN: Foxborough, MA
PATH: Research Technician, Massachusetts General Hospital Center for Computational and Integrative Biology; worked as a District Director in the Office of Massachusetts State Senator Paul Feeney; Honors Program member; MyPath Mentor; Chemistry Peer Tutor in the Academic Center for Excellence; Microbial Glycomics Lab Research Assistant for Professor Christopher Reid.

“The science program at Bryant gave me a group of professors who took me under their wings, who would always listen to my ideas and encourage me. They help you understand the breadth of what science is and that there are so many options within it. I think that’s really important for undergrads trying to figure out what they’re going to do next.”

WHAT SETS BRYANT’S PROGRAM APART?

1 Faculty and Facilities That Make a Difference

• From your first year, you have access to laboratory equipment in our 8,300-square-foot science complex and opportunities to collaborate with faculty, educational resources available only to graduate students at larger schools.

• Work with Bryant’s Pre-Health Advisor to design your academic path. Work closely with award-winning teacher-scholars who continually expand their expertise and mentor students throughout their programs.

2 Meaningful Learning Opportunities

• Start working toward attaining direct patient contact hours required for some post-graduate programs by taking an EMT course as early as freshman year.

• Participate in 10-week, paid summer fellowships funded by the National Science Foundation, the National Institutes of Health, and more.

• With more than 500 hospitals and medical, dental, mental health, and veterinary centers and clinics within a 50-mile radius of Bryant’s campus, students in the Pre-Health program are well positioned to take advantage of research, internship, and career opportunities.

3 Real-World Outcomes

• The quality of our Pre-Health Program results in a large percentage of graduates going on to top graduate and pre-professional schools.

• Special agreements guarantee you interviews with Western New England School of Pharmacy and Bryant’s Master of Science in Physician Assistant Studies programs.

• Whether you volunteer in a nearby hospital or shadow a doctor on rounds in the emergency room, the real-world experience you gain through the Pre-Health Program will impress medical and graduate school admission counselors.
